

Final Programme

18th - 21st October 2000

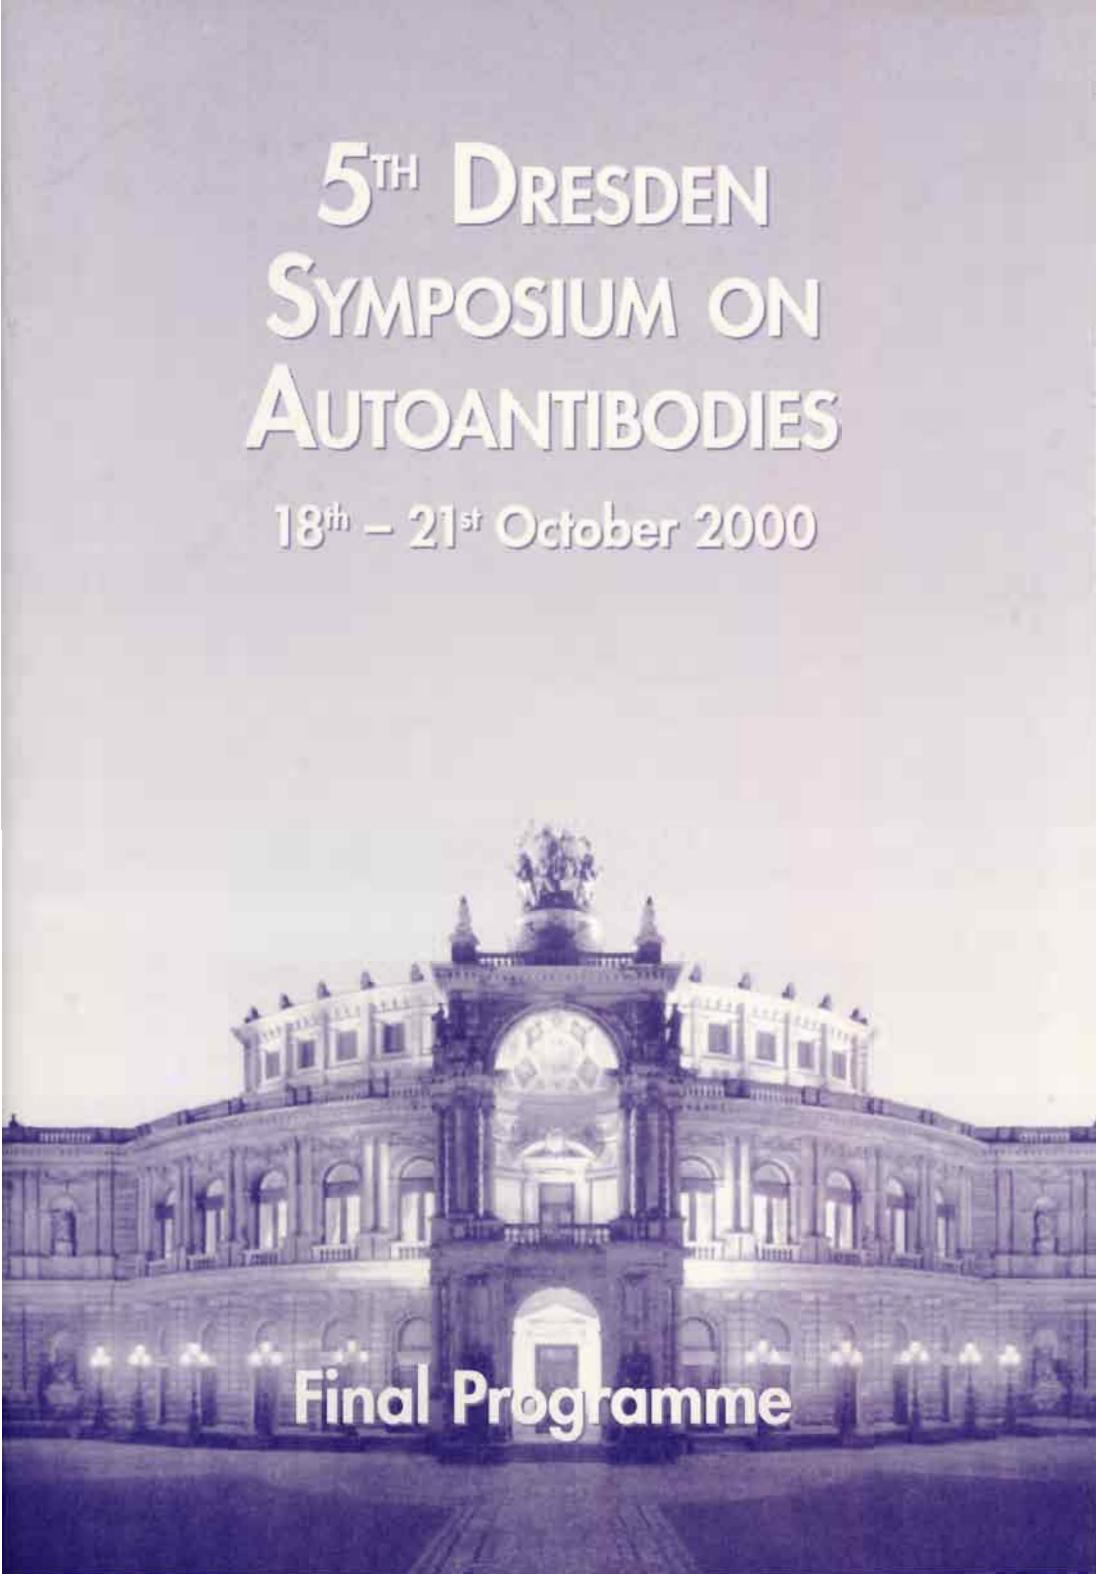

AUTOMOBILES

SYMPOSIUM ON

5TH DRESDEN

5TH DRESDEN SYMPOSIUM ON AUTOANTIBODIES

18th – 21st October 2000

Final Programme

DIAGNOSTIKA GMBH

SPECIAL TESTS FOR SPECIAL DISEASES

Disease	Antibodies against	Method
Myasthenia gravis	Acetylcholine Receptor (ACHRAB®-Assay)	^{125}I -RRA
Lambert-Eaton Syndrome	P/Q-Calcium Channel (LEMS®-Assay)	^{125}I -RRA
Thymoma	Titin (MGT30-Peplid)	ELISA
Addison's Disease	21-Hydroxylase	^{125}I -RA
Wegener's Granulomatosis	Proteinase 3 (C-ANCA)	ELISA
Microscopic Polyangiitis	Myeloperoxidase (P-ANCA)	ELISA
Goodpasture's Syndrome	Glomerular Basement Membran (GBM)	ELISA
Crohn's Disease	Saccharomyces cerevisiae (ASCA)	ELISA
Cystic Fibrosis	Bactericidal / Permeability Increasing Protein (BPI)	ELISA
Thyroid Disease	Thyroglobulin/Thyroid Peroxidase	ELISA
Graves' Disease	TSH Receptor (TRAb)	^{125}I -RRA, ^{125}I -ELISA
Insulin-Dependent Diabetes Mellitus (IDDM)	Protein-tyrosine-phosphatase (IA2) Glutamic acid decarboxylase (GAD 65) Insulin	^{125}I -RA ^{125}I -RA ^{125}I -RA
Coeliac Disease	Gliadin Transglutaminase-IgA	ELISA ELISA
Rheumatoid Arthritis	Fc region of IgG	ELISA
Anti-Phospholipid Syndrome	Cardiolipin	ELISA
Thrombosis, Anaemia	β 2 Glycoprotein-1	ELISA
Infectious Diseases	Helicobacter pylori Pseudomonas aeruginosa	ELISA ELISA

Dear Madam, dear Sir,

On behalf of the Organizing Committee and the International Advisory Board it is a great pleasure for me to welcome you in Dresden to the 5th Dresden Symposium on Autoantibodies.

One decade ago, we realized the First Dresden Symposium on Autoantibodies, just one week after the re-unification of Germany. Clinicians and scientists from the Eastern and the Western part of Germany, Austria and Luxembourg discussed mainly methodical aspects of the autoantibody determination but also the clinical and pathogenic relevance of autoantibodies. The topics of the Second Symposium in April 1993 dealled mainly with diagnostic aspects. The Third Symposium in September 1996 was a turning point in such way that we realized the first international meeting with participants from 14 countries. Besides general aspects like methods and clinical relevance, the role of pathogenic idiotypes and exogeneous factors in autoimmunity was discussed. Following the success of this symposium we decided to continue these series of International Autoantibody Symposia in Dresden. The main purpose of these meetings is to provide a podium for clinicians and scientists specialising in "autoimmunology" to exchange academic informations and to present and discuss the results of basic and applied research on autoantigens, autoantibodies and autoimmunity. The Fourth Symposium in October 1998 followed this concept. Autoantibodies and tumors was one of the topics of this meeting.

The research on genomics and proteomics leads to growing insights into the structure and function of autoantigens as well as into processes of the induction, diversification and pathogenic effects of autoimmune responses. In addition, more and more autoantigens and autoantibodies of potential diagnostic or pathogenic relevance were identified. We will continue the fruitful discussion on autoantigens and autoantibodies as clues to understanding autoimmunity and as tools in prediction, diagnosis and prognosis of autoimmune and other diseases.

I hope this meeting will be a success and that all participants will have an enjoyable stay in Dresden.

Karsten Conrad

Dear Madam, dear Sir,

On behalf of the Organizing Committee and the International Advisory Board it is a great pleasure for me to welcome you in Dresden to the 5th Dresden Symposium on Autoantibodies.

One decade ago, we realized the First Dresden Symposium on Autoantibodies, just one week after the re-unification of Germany. Clinicians and scientists from the Eastern and the Western part of Germany, Austria and Luxembourg discussed mainly methodical aspects of the autoantibody determination but also the clinical and pathogenic relevance of autoantibodies. The topics of the Second Symposium in April 1993 dealled mainly with diagnostic aspects. The Third Symposium in September 1996 was a turning point in such way that we realized the first international meeting with participants from 14 countries. Besides general aspects like methods and clinical relevance, the role of pathogenic idiotypes and exogeneous factors in autoimmunity was discussed. Following the success of this symposium we decided to continue these series of International Autoantibody Symposia in Dresden. WEDNESDAY
OCTOBER 16TH

8.15 WELCOME AND INTRODUCTIONS

8.30-10.30 AUTOANTIGENS – STRUCTURE, FUNCTION AND ROLE IN THE PATHOGENESIS OF AUTOIMMUNE DISEASES – PART I

Co-Chairs: E.M. Tan (La Jolla, USA)
Y. Takasaki (Tokyo, Japan)

- 8.30 The particle nature of intracellular autoantigens
F. Hiepe (Berlin, Germany)
- 9.00 Antigenicity, structure and function of the Sm protein family
T. Achsel, H. Brahms, R. Lührmann (Göttingen, Germany)
- 9.30 Autoantigenic complexes in the nucleolus of human cells
G. Pruijn (Nijmegen, The Netherlands)
- 10.00 Autoantibodies to the mitotic apparatus: biological breakthroughs, clinical application, etiological complexity
M. Fritzler, J.B. Rathner (Calgary, Canada)

10.30-11.00 COFFEE BREAK – POSTER AND EXHIBITION VIEWING

11.00-13.30 AUTOANTIGENS – STRUCTURE, FUNCTION AND ROLE IN THE PATHOGENESIS OF AUTOIMMUNE DISEASES – PART II

Co-Chairs: M. Bachmann (Oklahoma City, USA)
F. Hiepe (Berlin, Germany)

- 11.00 Detection of novel autoantigens by SEREX
M. Pfreundschuh (Homburg, Germany)
- 11.30 Autoantibodies to aberrantly regulated mRNA binding proteins in cancer
E.M. Tan, M. Lu, J.-Y. Zhang, E.K.L. Chan (La Jolla, USA)
- 11.50 Autoantibodies to PCNA and Ki - a linked set of autoimmune response associated with cellular function of target antigens
Y. Takasaki (Tokyo, Japan)

WEDNESDAY
OCTOBER 18TH

CBP/p300 and RNA-polymerase II colocalize in transcriptionally active domains in the nucleus <i>A. von Mikecz, S. Zhang, M. Montminy, E.M. Tan, P. Hemmerich (Düsseldorf, Germany)</i>	12.10
LEDGF, a novel autoantigen with putative growth factor and survival activities that is cleaved by caspases 3 and 7 during apoptosis <i>C. Casiano, C. Molinaro, T. Daniels, X. Wu (Loma Linda, USA)</i>	12.30
Description of a novel human protein, LaXp180, with homologies to the nuclear autoantigen La/SS-B, B1 Laminin and the protooncogene Stathmin <i>M. Bachmann, J. Laubinger, M. Schmitz, K. Conrad, E.P. Rieber (Oklahoma City, USA)</i>	12.50
Calcium ion mediated protein-protein interaction in the 60 kD Ro ribonucleo-protein particle <i>B.T. Kurien, R.H. Scofield, J.B. Harley, M. Bachmann (Oklahoma City, USA)</i>	13.10
LUNCH BREAK – POSTER AND EXHIBITION VIEWING	13.30–14.30
Poster	
Development of diagnostic marker peptides for autoimmune diseases using synthetic peptide libraries <i>M.A.M. van Boekel, J.W. Drijfhout, W.J. van Venrooij (Nijmegen, The Netherlands)</i>	P1
Identification of cation-independent mannose 6-phosphate receptor as a novel autoantigen by human monoclonal antibodies <i>D. Tarragó, I. Aguilera, I. Wichmann, J. Melero, A. Núñez-Roldán, B. Sánchez (Sevilla, Spain)</i>	P2
Attempt for the detection of novel autoantigens in rheumatic and infectious diseases <i>V. Schöllhorn, E. Stechemesser (Straßberg, Germany)</i>	P3

14.30-16.20 MECHANISMS OF AUTOANTIBODY INDUCTION

Co-Chairs: C. Casiano (Loma Linda, USA)
G. Pruijn (Nijmegen, The Netherlands)

Main Lectures

- 14.30 The potential contribution of various cell death pathways to the initiation of autoantibody responses
C. Casiano (Loma Linda, USA)
- 15.10 Somatic mutations, a mechanism for induction of autoantibodies ?
M. Bachmann (Oklahoma City, USA)

Short Lectures

- 15.50 Autoimmunity to the p53 protein is a feature of systemic lupus erythematosus (SLE) related to anti-DNA antibodies
J. Herkel, A. Mimran, N. Erez-Alon, V. Rotter, I.R. Cohen (Mainz, Germany)
- 16.05 Autoantigens of systemic rheumatic diseases are processed via proteasomes
T.D. Rockel, M. Chen, B. Dahlmann, P. Hemmerich, A. von Mikecz (Düsseldorf, Germany)
- 16.20-16.50 COFFEE BREAK – POSTER AND EXHIBITION VIEWING

Poster

- P4 Adoptive transfer of anti-La T-cells into human-La transgenic mice: Comparison of transgenic monoclonal anti-La antibodies with self- and non-self anti-La monoclonal antibodies of hyperimmunized mice
M. Bochmann, D. Farris, K.M. Kaufman, U. Drathen, C. Schörner, J. Gross, T. Gross, J.A. James, J.B. Harley (Oklahoma City, USA)
- P5 Immunization with 60kd Ro peptide leads to a diversified immune response to multiple lupus autoantigens
M.T. McClain, R.H. Scofield, T.F. Gross, B.T. Kurien, J.A. James (Oklahoma City, USA)
- P6 Fine specificity mapping of anti-nRNP monoclonal antibodies
C.S. Lutz, J.B. Harley, M.T. McClain, J.A. James (Newark, USA)

Fine specificity mapping of the lupus anti-Sm D2 and D3 autoimmune response and correlation with crystalline structure

M.T. McClain, K.M. Kaufman, J.B. Harley, J.A. James
(Oklahoma City, USA)

P7

A new allele of transporter associated with antigen processing gene (TAP2*Bky2) and glutathione S-transferase (GST) M1 homozygous null genotype were associated with anti-Ro/SS-A autoantibody production

S. Kumagai, S. Kanagawa, A. Morinobu, M. Koshiba,
S. Maekawa, N. Hayashi, S. Sugai, S. Miyagawa
(Kobe, Japan)

P8

PATHOGENIC EFFECTS OF AUTOANTIBODIES

Co-Chairs: A. Kromminga (Hamburg, Germany)
P.L. Meroni (Milan, Italy)

16.50-19.20

Main Lectures

The pathogenic role of autoantibodies in the genesis of autoimmune diseases

A. Kromminga (Hamburg, Germany)

16.50

Pathogenicity of anti-endothelial cell antibodies (AECA)

P.L. Meroni (Milan, Italy)

17.20

Short Lectures

Anti-PF4/heparin antibodies from patients with heparin induced thrombo-cytopenia and antiendothelial cell antibodies from patients with thrombotic thrombocytopenic purpura cause direct activation of microvascular endothelial cells

S. Praprotnik, M. Blank, P.L. Meroni, Y. Shoenfeld
(Ljubljana, Slovenia)

17.50

Stimulatory autoantibodies against the angiotensin II AT1-receptor in patients with preeclampsia and HELLP syndrome

G. Wallukat, R. Dechend, V. Hohmuth, T. Fischer,
D. Neichel, E. Nissen, F.C. Luft (Berlin, Germany)

18.05

Autoantibodies against the serotoninergic 5-HT4 receptor may be pathogenic in neonatal lupus

J. Hoebeke, P. Eftekhari (Strasbourg, France)

18.20

WEDNESDAY
OCTOBER 16TH

- 18.35 Antibodies from serum of patients with dilated cardiomyopathy prolong action potential duration and increase contraction amplitudes in rat ventricular myocytes
T. Christ, E. Weltwer, H.M. Himmel, E. Adolph, G. Wallukat, U. Ravens (Dresden, Germany)
- 18.50 Does the nuclear autoantigen La/SS-B function by binding/chelating divalent cations?
M. Bachmann, B.T. Kurien, C. Schörner, J. Gross, T. Gross, J.A. James, R.H. Scofield, J.B. Harley (Oklahoma City, USA)
- 19.05 The IL-8 Release from human cultured keratinocytes, mediated by autoantibodies to the 180 kD bullous pemphigoid antigen, is inhibited by Dapsone
E. Schmidt, S. Reimer, N. Kruse, S. Jainta, E.-B. Bröcker, D. Zillikens (Würzburg, Germany)

Poster

- P9 Association of anti-Ro antibodies and neutropenia in neonatal Lupus
S. Kanagasegar, R. Cimaz, B.T. Kurien, A. Brucato, R.H. Scofield (Oklahoma City, USA)
- P10 Autoantibody enhanced tissue damage caused by oxygen radicals in infectious mononucleosis
A. Dalpke, L. Schaade, K. Ritter (Aachen, Germany)

20.00 WELCOME RECEPTION

**NOVEL AUTOANTIBODIES OF DIAGNOSTIC
AND/OR PATHOGENIC RELEVANCE**

8.30-10.30

Co-Chairs: M. Fritzler (Calgary, Canada)
R.L. Humbel (Luxembourg)

Main Lectures

- Phage display as a tool to study the human autoantibody repertoire in systemic autoimmune diseases 8.30
J. Raats (Nijmegen, The Netherlands)
- Identification of cancer related autoantibodies by SEREX 8.55
U. Sahin, O. Türezi (Mainz, Germany)

Short Lectures

- Spectrum of human autoantibodies to Golgi complex and endosome antigens 9.20
E.K.L. Chan, M.I. Fritzler (Calgary, Canada)
- Western immunoblot method of detecting anti-68Kd antibodies associated with autoimmune hearing loss 9.30
V. Kumar, C. Zhu, N. Cook, M. Rajadhyaksha (Amherst, USA)
- Autoantibodies to receptor-induced neoepitopes of fibrinolytic proteins in rheumatic and vascular diseases. 9.40
*I. García-De Lo Torre, M. Domínguez, P. Cacoub,
J.-C. Piette, M. Salazar-Páramo, P. Godeau, E. Anglés-Cano
(Guadalajara, Mexico)*
- Antibodies recognizing transcription intermediary factor-1 β , or hexokinase 1, in four family members of a scleroderma patient 9.50
G.R. Harvey, J. Dixey, N.I. McHugh (Bath, UK)
- Description of antibodies to oxidized forms of the autoantigen La/SS-B 10.00
*S. Kanagasegar, B.T. Kurien, H. Deister, K. Conrad,
R.J. Gross, T. Gross, J.A. James, R.H. Scofield, J.B. Harley,
M. Bochmann (Oklahoma City, USA)*
- Antibodies against superoxide dismutase and oxidative injury in systemic lupus erythematosus 10.10
R.H. Scofield, B.T. Kurien (Oklahoma City, USA)

THURSDAY
OCTOBER 19TH

Poster

- P11 Detection of antibodies to inner-ear
P. Schmit, V. Pierrard, R.L. Humbel (luxembourg)
- P12 Identification of the heterogeneous nuclear ribonucleoprotein K (hnRNP-K) as a novel autoantigen in SLE
S. Hayer, G. Fabini, K. Scriner, C. Zimmermann, G. Steiner (Vienna, Austria)
- P13 Antibodies against inhibitor of apoptosis protein survivin: a novel diagnostic marker of cancer?
J. Rohayem, P. Diestelkötter, B. Weigle, M. Schmitz, K. Conrad, J. Mehlhorn, E.P. Rieber (Dresden, Germany)
- P14 Role of autoantibodies in q fever. Relationship with chronic disease
J. Segui, M.T. Camacho, B. Bustillo, A. Tellez, I. Outschoorn, J. Gonzalez, J.M. Vazquez, A.I. Marina, A. Sobrado, M.A. San Martin, I. Terol (Madrid, Spain)

10.20-11.00 COFFEE BREAK – POSTER AND EXHIBITION VIEWING

11.00-12.50 AUTOIMMUNITY IN ANTI-PHOSPHOLIPID SYNDROME AND ATHEROSCLEROSIS

Co-Chairs: T. Koike (Sapporo, Japan)
Y. Shoenfeld (Tel Hashomer, Israel)

Main Lectures

- 11.00 Atherosclerosis as an autoimmune disease – Autoantigens, autoantibodies and immunomodulation
Y. Shoenfeld (Tel Hashomer, Israel)
- 11.35 Anticardiolipin antibody, thrombosis and atherosclerosis
T. Koike (Sapporo, Japan)

Short Lectures

- 12.05 Differential linear epitope binding of natural and SLE auto-antibodies to HDL oapolipoprotein A-1
H.M. Cheng, S.L. Tung, C.K. Sam (Kuala Lumpur, Malaysia)
- 12.20 Could anti-beta₂-glycoprotein I antibody ($\alpha\beta_2\text{-GPI}$) investigation substitute for that of anticardiolipin antibodies (αCL) in the exploration of antiphospholipid syndrome (APS)?
P. Roll, M. San Marco and GEAI (Groupe d'étude de l'autoimmunité) (Marseille, France)

THURSDAY
OCTOBER 1994

Clinical reliability of antiphospholipide autoantibodies (APA)
in the diagnosis of acute cerebrovascular processes
U. Sack, J. Förster, F. Emmrich, M. Komprad
(Leipzig, Germany)

12.35

Poster

Evaluation study on a new anti- β_2 -glycoprotein I screening ELA
B. Gilburd, L. Rauovo, Y. Nesher, Y. Shoenfeld (Tel Hashomer, Israel)

P15

Comparing different anti-cardiolipin- and anti- β_2 -
glycoprotein-I antibody ELISA in autoimmune diseases
*R. Wöhrl, T. Matthias, P. von Landenberg, M. Oppermann,
K. Helmke, F. Förger* (München, Germany)

P16

Autoantibodies ogainst low density lipoproteins in patients
with hyperlipoproteinemia
*L. Fialová, L. Mikulíková, M. Zeman, A. Zák,
E. Tvrzická, M. Buchtíková, B. Stanková, I. Matous-Malbohan*
(Prague, Czech Republic)

P17

A novel assay for the measurement of anti-cardiolipin anti-
bodies using a combination of synthetic cardiolipin and
human β_2 -glycoprotein 1
R. Seaton, A. Vasishta (Dundee, UK)

P18

Comparison of different commercial kits for the quantifica-
tion of anti-cardiolipin and anti- β_2 -glycoprotein I antibodies
M. Komprad, J. Förster, F. Emmrich, U. Sack
(Leipzig, Germany)

P19

Autoantibodies against oxidized low density lipoproteins and
anti- β_2 -glycoprotein I in pregnant women
*I. Matous-Malbohan, L. Fialová, L. Mikulíková, T. Zima,
O. Benesová, A. Zwinger* (Prague, Czech republic)

P20

Antibodies against oxidized low density lipoproteins and
phospholipids in patients with renal disorders
*I. Matous-Malbohan, L. Fialová, L. Mikulíková, T. Zima,
V. Tesar, M. Merta* (Prague, Czech Republic)

P21

An enzyme immunoassay for the detection of antibodies to
oxidized low density lipoproteins
V. Kumar, J. Schwartz, V. Ramsperger, M. Rajadhyaksha
(Amherst, USA)

P22

LUNCH BREAK – POSTER AND EXHIBITION VIEWING

12.50–14.00

THURSDAY
OCTOBER 19TH

14.00-17.15 AUTOIMMUNITY IN RHEUMATOID ARTHRITIS

Co-Chairs: G.R. Burmester (Berlin, Germany)
G. Steiner (Vienna, Austria)

Main Lectures

- 14.00 Cellular autoimmunity in rheumatoid arthritis
G. Burmester (Berlin, Germany)
- 14.30 Autoantibodies and autoreactive T cells in rheumatoid arthritis
G. Steiner (Vienna, Austria)
- 15.00 Autoreactivity profiling in rheumatoid arthritis
F. Schumann, S. Behrens, S. Adelt, H. Hofseß, G.R. Burmester, J.M. Engel, S. Bläß (Berlin, Germany)
- 15.30-16.00 COFFEE BREAK – POSTER AND EXHIBITION VIEWING

Short Lectures

- 16.00 Antibodies to cyclic citrullinated peptide: a highly specific test for rheumatoid arthritis
N. Bizzaro, G. Mazzanti, E. Tonutti, D. Villalta, R. Tozzoli (S. Donà di Piave, Italy)
- 16.15 Anti-filaggrin antibodies detected by line immunoassay: a highly specific marker for rheumatoid arthritis with complementarity to RF
A. Union, R. Humbel, K. Conrad, G. Steiner, P. Schmit, A. Vos, S. Dincq, H. Pottel, L. Meheus (Ghent, Belgium)
- 16.30 Sensitivity and specificity of anti-filaggrin autoantibodies in a cohort of 167 patients with rheumatoid arthritis
C. Ferraro-Peyret, J. Tebib, A. Desbos, R. Bihannic, C. Genestier, S. Veber, M.C. Letroublon, J.C. Monier, N. Fabien (Pierre-Bénite, France)
- 16.45 The stress protein BiP is a major autoantigen in rheumatoid arthritis
S. Bläß, A. Union, J. Raymackers, F. Schumann, J.M. Engel, G.R. Burmester (Berlin, Germany)

THURSDAY
OCTOBER 15TH

Poster

- | | |
|---|-----|
| Autoantibodies to denatured Aldolase A in rheumatoid arthritis
<i>P. Schmit, G. Gilson, R.L. Humbel (Luxembourg)</i> | P23 |
| Rheumatoid factors and autoreactivity against p205 in RA
<i>S. Bläß, F. Schumann, J.-M. Engel, G.R. Burmester (Berlin, Germany)</i> | P24 |
| Measurement of anti-citrullinated peptides antibodies and „anti-keratin“ antibodies. A comparative study.
<i>R.L. Humbel, P. Schmit, V. Pierrard, M. Goeury (Luxembourg)</i> | P25 |
| Evaluation of an enzyme immunoassay for the detection of rheumatoid factors of all antibody isotypes
<i>X. Bossuyt, G. Claeys, K.-G. Heide (Bad Bramstedt, Germany)</i> | P26 |
| Application of the EliSpot method for the analysis of T-cell specific cytokines of patients with rheumatoid and reactive arthritis
<i>V. Schöllhorn, R. Preyer (Strassberg, Germany)</i> | P27 |

FRIDAY
October 20th

8.30-10.25 AUTOIMMUNITY IN LIVER DISEASES

Co-Chairs: M.P. Manns (Hannover, Germany)
E.M. Tan (La Jolla, USA)

Main Lecture

- 8.30 Liver diseases: Models to study virus-induced, drug-induced and idiopathic autoimmunity
M.P. Manns (Hannover, Germany)

Short Lectures

- 9.00 Hepatic autoantigens in patients with autoimmune polyendocrinopathy-candidiasis-ectodermal dystrophy
P. Obermayer-Straub, J. Perheentupa, S. Braun, A. Kayser, A. Barut, S. Loges, A. Harms, G. Dalekos, C.P. Strassburg, M.P. Manns (Hannover, Germany)
- 9.15 Full-length formiminotransferase cyclodeaminase derived from baculovirus expression is a most suitable target for detecting anti-LC1 autoantibodies in AIH type II
Th. Simon, R. Kneusel, R.L. Humbel, P. Schmit, C. Johanet, H. Haubruck, B. Lievdogel (Freiburg, Germany)
- 9.25 SLA-P35: A cDNA encoding a gene product which specifically recognizes anti-SLA/LP sera from patients with autoimmune hepatitis
M. Volkmann, L. Martin, A. Bärle, H. Heid, C. Strassburg, C. Trautwein, W. Fiehn, M.P. Manns (Heidelberg, Germany)
- 9.35 Autoantibodies to soluble liver antigen (SLA/LP) recognize at least three independent epitopes within the dominant antigenic region of the SLA/LP protein
J. Herkel, B. Heidrich, I. Wies, A.W. Lohse (Mainz, Germany)
- 9.45 The major autoepitope of LKM1 autoantibodies in autoimmune hepatitis type 2 and in chronic hepatitis C is homologous to other cytochrome p450 autoantigens
T. Sugimura, P. Obermayer-Straub, A. Kayser, S. Braun, S. Loges, B. Lüttig, C.P. Strassburg, M.P. Manns (Hannover, Germany)
- 9.55 A 50 kD myeloid cell-specific, nuclear envelope protein is the predominant target antigen of atypical p-ANCA in autoimmune liver disorders
B. Terjung, U. Spengler, T. Sauerbruch, H.J. Worman (New York, USA)

FRI DAY
OCTOBER 2011

Frequency of anti-Sp100 antibodies in antinuclear positive sera <i>R.L. Humber, C. Johonet, F. Oksman, M. San Marco, A. Escande, N. Olsson and members of the Group for Study of Autoimmunity GEAI, C. Hentschel, W. Schössler (Luxembourg)</i>	10.05
COFFEE BREAK – POSTER AND EXHIBITION VIEWING	10.15–11.30

Poster

Establishment of a standardized SLA/LP immunoassay: SLA/LP positive autoimmune hepatitis occurs worldwide <i>M. Bäres, J. Herkel, I. Wies, S. Kanzler, A.J. Czaja, E.L. Cancado, M. Nishioka, W. Schlumberger, W. Stöcker, A.W. Lohse (Mainz, Germany)</i>	P28
Heterogeneity of anti-soluble liver antigen autoantibodies targets <i>E. Ballot, A. Bruneel, C. Johonet (Paris, France)</i>	P29
Recombinant SLA/LP increases the sensitivity of an anti-liver antibody westernblot for the diagnosis of autoimmune hepatitis <i>T. Scheper, W. Meyer, A. Lohse, W. Schlumberger, W. Stöcker (Groß Grönau, Germany)</i>	P30
Kinetics of anti-gp210 antibodies in primary biliary cirrhosis patients with ursodesoxycholic acid therapy <i>M. Boissan, E. Ballot, C. Johonet (Paris, France)</i>	P31
Evaluation of an automated enzyme inhibition assay for the detection of anti-mitochondrial M2 autoantibodies <i>P. Schmit, G. Gilson, R.L. Humber (Luxembourg)</i>	P32
Clinical correlation of antimitochondrial antibodies <i>C. Recktenwald, M.A. Zuber (Leipzig, Germany)</i>	P33
Nuclear autoantibody profile in patients with liver disorders <i>L. Meheus, K. De Bosschere, H. Pottel, I. Peene, F. Hulstaert, F. De Keyser, M.P. Manns (Zwijnaarde, The Netherlands)</i>	P34
Autoantibody to dihydrolipoamide dehydrogenase (E3) in hepatitis C infection <i>Y.-Y. Wu, T.-C. Hsu, T.-C. Liu, T.-Y. Chen, G.I. Tsay (Taichung, Taiwan)</i>	P35

FRIDAY
OCTOBER 20TH

- P36 Autoimmune hepatitis and hepatitis as part of APECED do not overlap at the genetic level
A. Vogel, H. Liermann, A. Harms, C.P. Strassburg, M.P. Manns, P. Obermayer-Straub (Hannover, Germany)
- P37 Pathogeny of the primary biliary cirrhosis: the participation of endotoxin
E. Ballot, O. Bandin, R. Poupon, C. Johanet (Paris, France)
- P38 Specificity of antinuclear envelope antibodies to glycoprotein GP210 and Lamin-B-Receptor
P. Schmit, R.L. Humbel, C. Hentschel, W. Schössler (Luxembourg)

11.00-13.05 AUTOIMMUNITY IN GASTROINTESTINAL DISEASES

Co-Chairs: J. Henker (Dresden, Germany)
F. Seibold (Bern, Switzerland)

Main Lectures

- 11.00 Autoimmunity in chronic inflammatory bowel disease
F. Seibold (Bern, Switzerland)
- 11.30 Immune reactivities in coeliac disease
J. Henker, Dresden, Germany
- 12.00 A new tool to approach the diagnosis of autoimmune enteropathy
A.M. Yamamoto, I. Kobayashi, N. Cerf-Bensussan, J.F. Bach, N. Brousse, C. Ricour, O. Goulet (Paris, France)

Short Lectures

- 12.20 Antibody response to dietary and autoantigens in $\text{G}\alpha i2$ deficient mice with colitis
H.H. Uhlig, E. Hultgren Hörnquist, L. Öhman, T. Richter, T. Mothes (Leipzig, Germany)
- 12.35 Comparative study of ASCA (anti-Saccharomyces cerevisiae antibodies) assays in inflammatory bowel disease (IBD)
S. Vermeire, S. Joossens, M. Peeters, G. Marien, X. Bossuyt, R. Vlietinck, P. Rutgeerts (Leuven, The Netherlands)
- 12.50 Relevance of antibodies against *Saccharomyces cerevisiae* for the diagnosis of chronic-inflammatory bowel disease
B. Zerbe, B. Teegen, C. Dähnrich, W. Schlumberger, E. Müller-Kunert, M. Groeury, R.L. Humbel, W. Stöcker (Groß Grönau)

FRIDAY
OCTOBER 2011

LUNCH BREAK – POSTER AND EXHIBITION VIEWING

13.05–14.30

Poster

Autoantibody profiles in patients with inflammatory bowel diseases

P39

K. Conrad, A. Schäfer, G. Iobeck, H.H. Uhlig, S. Gerdi,
J. Henker (Dresden, Germany)

Diagnostic value of ASCA and p-ANCA in inflammatory bowel diseases

P40

K. Malickova, I. Janatkava, T. Fucikova, M. Lukas,
S. Adamec (Prague, Czech Republic)

Clinical evaluation of recombinant human tissue transglutaminase ELISA for coeliac disease diagnosis

P41

J. Dahlbom, P. Höpfl, H. Gut, M.-R. Ståhlberg, H. Nurmi,
J. Grönlund, M. Viander (Freiburg, Germany)

Improvement of celiac disease diagnostics using ELISA with human recombinant tissue transglutaminase as antigen

P42

P. Höpfl, J. Dahlbom, A.-S. Andersson, H. Gut, B. Backhans,
C. Scheckermann, L. Mauch (Freiburg, Germany)

Tissue Transglutaminase (tTG) Immunoassays: requirement of specific conditions for the reliable detection of specific autoantibodies

P43

A. Vigneron, J. Bouvier, V. Vancoppenolle (Mons, Belgium)

Human endomysium ELISA as an innovative assay for the diagnosis of coeliac disease

P44

W. Schlumberger, C. Dähnrich, S. Kardinahl, M. Ossendorf,
P. Annis, B. Teegen, E. Müller-Kunert, W. Stöcker
(Groß Grönau, Germany)

Recombinant human tissue transglutaminase ELISA for the diagnosis and follow-up of childhood coeliac disease

P45

T. Hansson, J. Dahlbom, S. Rogberg, B. Backhans, P. Höpfl,
H. Gut, A. Dannæus, L. Klareskog (Freiburg, Germany)

Diagnosis of celiac disease by ELISA: The importance of the formation of neoepitopes of tissue transglutaminase (tTG) versus the human or guinea pig origin

P46

A. Maaßen, K. Conrad, T. Porstmann
(Dolgenbrodt, Germany)

- P47 Autoantibodies to tissue transglutaminase (tTG) in primary Sjögren's Syndrome and related rheumatic diseases
L.A. Luft, B.J. Miller, R. McKenna, T. Chan, M.I. Fritzler
(Calgary, Canada)
- P48 Helicobacter pylori (Hp) infection in patients with autoimmune gastric disease
F. Presotto, B. Sabini, A. Cecchetto, M. Plebani, B. Pedini, F. De Lazzari, C. Betterle (Padova, Italy)

14.30–15.30 B AND T CELLS IN AUTOIMMUNITY

Chair: R.H. Scofield (Oklahoma City, USA)

- 14.30 The role of B cells in autoimmunity
A. Radbruch (Berlin, Germany)
- 15.00 Epitope spreading and maturation of self and non-self reactive B cells in autoimmune patients and experimental animals
M. Bachmann (Oklahoma City, USA)
- 15.15 Disturbed peripheral B lymphocyte homeostasis in SLE
M. Odendahl, A. Jacobi, A. Hansen, E. Feist, F. Hiepe, G.R. Burmester, P.E. Lipsky, A. Radbruch, T. Dörner
(Berlin, Germany)

Poster

- P49 Cytokine mRNA expression in murine mercury- and silver-induced autoimmunity
B. Häggqvist, P. Hultman (Linköping, Sweden)

15.30–16.00 COFFEE BREAK – POSTER AND EXHIBITION VIEWING

FRIDAY
OCTOBER 2014

AUTOIMMUNITY IN NEUROLOGICAL AND PARANEOPLASTIC DISEASES

Co-Chairs: J. Dalmau (Little Rock, USA)
A.J. Steck (Basel, Switzerland)

16.00-18.30

Main Lectures

Clinical and biological aspects of autoantibodies in immune neuropathies <i>A.J. Steck (Basel, Switzerland)</i>	16.00
Antigens, antibodies and mechanisms of immunity in paraneoplastic disorders of the central nervous system <i>J. Dalmau (Little Rock, USA)</i>	16.30
Autoimmunity in Stiff-Man syndrome <i>M. Solimena (New Haven, USA)</i>	17.00

Short Lectures

Paraneoplastic anti-Ta and anti-Ma antibody reactivities: an update of 21 patients <i>R. Voltz, M. Rosenfeld, J. Posner, J. Dalmau (München, Germany)</i>	17.20
Frequency of paraneoplastic autoantibodies and associated neurological and tumor diagnoses <i>B. De Leeuw, J. Grefkens, H. Hooikaas, P.A.E. Sillevis Smitt (Rotterdam, The Netherlands)</i>	17.35
Flow cytometry as a new method for the detection of surface-binding autoantibodies in autoimmune neuromuscular diseases <i>F. Blaes, B. Lang, D. Beeson, A. Vincent (Giessen, Germany)</i>	17.50
Problems in the determination of anti-GAD antibodies in Stiff-Man Syndrome <i>R.L. Humbel, M. Goeury, V. Pierrard, P. Schmit, G. Gilson (luxembourg)</i>	18.05
Autoantibodies from patients with idiopathic ataxia bind to M-phase phosphoprotein-1 (MPP1) <i>M.J. Fritzler, S.M. Kerfoot, T.E. Feasby, D.W. Zochodne, J.M. Westendorf, J.O. Dalmau, E.K.L. Chan (Calgary, Canada)</i>	18.20

FRIDAY
OCTOBER 25TH

Poster

- P50 Disturbance in the serum IgG subclass distribution in patients with anti-Hu positive paraneoplastic neurological syndromes
M. Klotz, D. Funke, M. Strittmatter, K. Schimrigk, H. Huwer, F. Blaes (Giessen, Germany)
- P51 EUROLINE Ganglioside Profile: A new membrane test for the detection of autoantibodies against gangliosides
W. Meyer, B. Schneider, M. Klotz, W. Schlumberger, W. Stöcker (Groß Schönau, Germany)

20.00 SOCIAL DINNER

SATURDAY
OCTOBER 21ST

AUTOIMMUNITY IN SKIN DISEASES

Co-Chairs: M. Meurer (Dresden, Germany)
G. Messer (Munich, Germany)

8.30-10.30

Main Lectures

Autoimmune responses in alopecia, vitiligo and polyglandular autoimmune syndrome <i>K. Schäkel, M. Meurer (Dresden, Germany)</i>	8.30
Is Psoriasis an autoimmune disease ? <i>J. Prinz (Munich, Germany)</i>	8.50
New concepts in the understanding of skin directed autoimmunity <i>G. Messer (Munich, Germany)</i>	9.10

Short Lectures

Autoantibodies to structural components of the skin induce blisters in patients with autoimmune bullous diseases <i>C. Sitaru, A. Kromminga, W.H. Boehncke, D. Zillikens (Würzburg, Germany)</i>	9.30
Enrichment and analysis of memory B-Cells specific for the NC16A domain of the 180kD antigen in bullous pemphigoid patients <i>H. Leyendeckers, C. König, M. Assenmacher, L. Bruckner-Tuderman, T. Krieg, R. Nischt, J. Schmitz, N. Hunzelmann (Cologne, Germany)</i>	9.40
Anti-Fibrillin autoantibodies in scleroderma and mixed connective tissue disease <i>C. Bona (New York, USA)</i>	9.50
Autoantibodies to the high-affinity IgE receptor in chronic urticaria <i>M. Sticherling, J. Müller, R. Arndt, E. Christophers, A. Kromminga (Kiel, Germany)</i>	10.00
Autoantibodies in erythema exsudativum multiforme majus <i>D. Foedinger (Vienna, Austria)</i>	10.10
Patients with bullous pemphigoid and linear IgA disease show a dual IgA and IgG autoimmune response to BP180 <i>A. Kromminga, C. Scheckenbach, M. Georgi, C. Hagel, R. Arndt, E. Christophers, E.B. Bröcker, D. Zillikens (Hamburg, Germany)</i>	10.20

SATURDAY
October 21st

10.30–11.00 COFFEE BREAK – POSTER AND EXHIBITION VIEWING

Poster

- P52 Coexistence of anti centromere and anti topoisomerase I antibodies in a patient with silica induced scleroderma
G.F. Mora, E.M. Rivero, L.M. Cayetti, H.O. Venarotti (Buenos Aires, Argentina)
- P53 Scl-70 antibodies are highly specific and prevalent in systemic scleroderma (SSc)
M. Jarzabek-Chorzelska, W. Meyer, M. Blaszczyk, Z. Kolacinska-Strasz, B. Teegen, S. Jablonska (Groß Grönau, Germany)
- P54 Detection of autoantibodies in chronic urticaria – Results of an in-patient study at Kiel university
M. Sticherling, C. Garrelfs (Kiel, Germany)
- P55 A new ELISA for the quantitative determination of anti-Desmoglein 1 and 3 antibodies
P. Schmit, G. Gilson, R.L. Humbel (Luxembourg)

**11.00–15.00 METHODICAL ASPECTS
AND DIAGNOSTIC STRATEGIES**

Co-Chairs: K. Conrad (Dresden, Germany)
R.L. Humbel (Luxembourg)

Main Lectures

- 11.00 New developments in autoantibody detection
R.L. Humbel (Luxembourg)
- 11.30 Improved diagnostic performance by determination of defined autoantibody profiles
K. Conrad (Dresden, Germany)
- 12.00 New ways of standardization: Chimeric monoclonal antibodies
Th. Simon, N. Joswig, H. Mossmann, R. Kneusel, H.J. Jakobsen, B. Liedvogel, H. Haubruck (Freiburg, Germany)
- 12.20 The anti-nucleosome autoantibodies: clinical significance and role in the diagnosis of diseases
S. Koutlouzov, J.-F. Bach, A. Jeronimo, H. Campos, J.-C. Piette, Z. Amoura (Paris, France)

SATURDAY
OCTOBER 21st

COFFEE BREAK – POSTER AND EXHIBITION VIEWING 12.40–13.40

Short Lectures

Software-assisted recognition of fluorescent ANA patterns: Use for teaching, learning, quality assurance and standardization <i>M. Høier-Madsen, C. Ingwersen, J. Meyrowitsch, P. Charles, J. Forsslid, A. Wiik (Copenhagen, Denmark)</i>	13.40
Enzyme immunoassay by a mixture of a nuclear HEp-2 cell extract and recombinant proteins is equally or more useful than immunofluorescence assay for detection of antinuclear antibodies (ANA) <i>N. Hayashi , T. Kawamata, M. Mukai, A. Morinobu, M. Kashiba, S. Kondo, S. Kumagai (Kobe, Japan)</i>	13.55
Performance of the HYTECTM Plus, a fully automated EIA system for the detection of 29 clinically relevant autoantibodies <i>A. Chen, L.Bui, S. Moghaddam, J. Daedelow, K.W. Steffen, D. Thear, N. Nayak, K.J. Kontis, U. Schlensog, J. Weston, T.M. Li (Garden Grove, California, USA)</i>	14.10
Clinical usefulness of antibodies to Sm-B/B' UsnRNP poly-peptides in CTD patients <i>A. Ghirardella, A. Doria, S. Zampieri, D. Villalta, R. Tozzoli, M. Tonello, T. Del Ross, P.F. Gambari (Padova, Italy)</i>	14.25
Can fibronectin-IgG-complexes pretend anti-C1q autoantibodies in patients with SLE? <i>B. Pfueller, A. Bruns, S. Kuhn, H. Droege, G.-R. Burmester, F. Hiepe (Berlin, Germany)</i>	14.40

SATURDAY
October 21st

Poster

- P56 Comparative evaluation of two anti-nuclear autoantibody [ANA] detecting assay systems, COBAS® Core HEp2 ANA EIA versus IFA, by an International Consensus Study
P.M. Bayer, S. Bauerfeind, J. Bienvenu, B. Fabian, N. Fabien, P.C. Frei, B. Gilburd, K.-G. Heide, M. Hoier-Madsen, P.L. Meroni, J.C. Monier, G. Monneret, P. Panzeri, Y. Shoenfeld, F. Spertini, A. Wiik, R.L. Humbel (Vienna, Austria)
- P57 Comparison of three different dsDNA-ELISA with special regard to their efficiency in the diagnosis of systemic lupus erythematosus
M. Linemann, C. Geisen, S. Menn, R. Dinser, C. Herzberg, K. Wielckens (Cologne, Germany)
- P58 Anti-C1q-Autoantibodies in patients suffering from systemic lupus erythematoses
D. Herrmann, P. Oelzner, G. Hein, R. Fünfstück, G. Stein (Jena, Germany)
- P59 Antibody determination against ENA – a challenge for the routine laboratory
M. Schmolke, M. Oppermann, K. Helmke, W.G. Guder (Munich, Germany)
- P60 Sicca complex and organ-specific autoantibodies
S. Paranos, M. Cosic, L. Jelenkovic, M. Milovanovic, Z. Sporic (Belgrade, Yugoslavia)
- P61 Prevalence of anti-PL-12 antibodies in interstitial lung disease
I. Wichmann, A. Alvarez Marquez, R. García Lozano, N. Respaldiza Salas, K. Walter Pérez, M. Montes Cano, E. Rodríguez Becerra, A. Núñez Roldán (Sevilla, Spain)
- P62 Detection of anti-calcium sensing receptor auto-antibodies using a radioimmunoprecipitation assay.
C. Ploix, A. Durand, S. Veber, A. Moreira, A. Desbos, J. Bienvenu, J. Orgiazzi, J.C. Monier, N. Fabien (Benite Cedex, France)
- P63 Anti-nucleosome autoantibodies and systemic lupus erythematosus: experience performed by using a commercial dot kit
G. Morozzi, A. Simpatico, G. Pucci, S. Cucini, F. Bellisai, O. De Pità, R. Marcolongo, M. Galeazzi (Siena, Italy)

SATURDAY
OCTOBER 21ST

Low incidence of nuclear, parietal cell and thyroid microsomal antibodies among males under 40 year of age in an unselected population sample from Estonia
K. Metsküla, R. Uibo (Tartu, Estonia)

P64

Antinucleosome autoantibodies in the diagnosis of SLE: a preliminary report of a comparative evaluation of three commercial methods
D. Villalta, R. Tozzoli, A. Doria, A. Ghirardello, P.F. Gambari, N. Bizzaro, E. Tonutti, P. Rizzotti (Pordenone, Italy)

P65

Analytical variability of ELISA methods for thyroid autoantibodies detection affect the clinical performances inAITD diagnosis
R. Tozzoli, D. Villalta, N. Bizzaro, E. Tonutti, F. Manoni, D. Bassetti, A. Piazza, M. Pradella, P. Rizzotti (Latasa, Italy)

P66

Improved sensitivity for detection of SS-A/Ro52, SS-A/Ro60 and SS-B/La in Sjögren's syndrome using INNO-LIATM ANA update
D. Crosbie, K. De Bosschere, D. Cavill, F. Hulstaert, H. Pottel, S. De Keyser, H. Boeykens, T. Gordon, L. Meheus (Zwijnaarde, The Netherlands)

P67

The risk for Type 1 diabetes mellitus (DM) increases with the number of serological markers of pancreatic autoimmunity in adult patients with organ-specific autoimmune diseases
C. Betterle, C.A. Spadaccino, F. Presotto, R. Zanchetta, B. Pedini, M. Iai, N.A. Greggio, G.F. Bottazzo (Padova, Italy)

P68

Karlsburg type 1 diabetes risk study in normal schoolchildren – Multiple autoantibodies and genetic risk markers predict diabetes onset
M. Schlosser, R. Wassmuth, M. Strelbow, B. Ziegler, M. Ziegler (Karlsruhe, Germany)

P69

21-Hydroxylase is the major target of adrenal cortex autoantibodies (ACA) in patients with different clinical forms of autoimmune Addison's disease
C. Dal Pra, F. Presotto, B. Pedini, M. Volpato, R. Zanchetta, C. Betterle (Padova, Italy)

P70

Early diagnosis of lung cancer by combined determination of tumor-associated autoantibodies
K. Conrad, J. Rohayem, J.-Y. Zhang, M. Schmitz, J. Mehlhorn, E.M. Tan, E.P. Rieber (Dresden, Germany)

P71

INFORMATION IS

Venue	The Hotel Westin Bellevue is located in a pleasant area of the city on the right bank of the Elbe River, 10 minutes walk away from the famous „Zwinger“, the Semper Opera and the other baroque buildings of the ancient Dresden. Große Meißner Strasse 15, D-01097 Dresden
Registration office	October 18 th , 2000, 7.00 a.m. – 7.00 p.m. October 19 th , 2000, 7.00 a.m. – 7.00 p.m. October 20 th , 2000, 7.30 a.m. – 7.00 p.m. October 21 st , 2000, 8.00 a.m. – 3.00 p.m.
Phone/Fax on site	Phone +49 351 805-1946 Fax +49 351 805-2946

Organisation
 [Registration, Reservation, Exhibition]

	until June 20 th	from June 21 st	Registration fee
Participants	DM 350 (€ 178,95)	DM 400 (€ 204,52)	
Students/Residents	DM 100 (€ 51,13)	DM 150 (€ 76,69)	
One day ticket	DM 120 (€ 61,36)		

(includes unlimited access to all scientific sessions, Get-together reception, industrial exhibition, final programme, first issue of the book series „Autoantigens, Autoantibodies, Autoimmunity“ including Abstracts and Papers of the presentations of the Symposium, coffee and lunch breaks)

Wednesday, 18th October, 2000
 8.00 p.m. – Welcome Reception

Social Programme

Friday, 20th October, 2000
 8.00 p.m. – Social Dinner
 DM 50 (€ 25,56)

- Sightseeing and river boat tours
- Visit of the Green Vault and other famous museums
- Visit of the famous Semper Opera House
- Trips to famous places in the environs of Dresden (Pillnitz, Moritzburg, Meißen, Radebeul, etc.)
- Trips to the „Sächsische Schweiz“

Pre-/Post-Congress Tours

Corresponding offers will be featured in the programme as well as the opening reception.

October 9th – 12th, 2002

6th Dresden Symposium

EXHIBITORS AND SPONSORS

The following companies participate in the Industrial-Exhibition or have made a generous sponsoring and we thank all of them for helping to make this symposium successful.

(state on day of printing the final programme)

BECKMAN COULTER GMBH, Krefeld

D L D DIAGNOSTIKA GMBH, Hamburg

EUROIMMUN GMBH, Groß Grönau

IMTEC IMMUNDIAGNOSTIKA GMBH, Berlin

INNOGENETICS GMBH, Heiden

MEDICAL & BIOLOGICAL LABORATORIES CO., LTD.,
Nagoya (Japan)

MEDIPAN DIAGNOSTICA GMBH, Selchow

MERIDIAN DIAGNOSTICS EUROPE GMBH,
Bad Homburg v.d.H.

MILENIA BIOTEC GMBH, Bad Nauheim

ORGENTEC DIAGNOSTIKA GMBH, Mainz

**PHARMACIA & UPJOHN DIAGNOSTICS
GMBH & CO. KG**, Freiburg

PROGEN IMMUNO-DIAGNOSTIKA, Heidelberg

SERAMUN DIAGNOSTICA GMBH, Dolgenbrodt

VIVA DIAGNOSTIKA GMBH, Hürth
